

Dialogue Genie

Helping companies to move from legacy document generation to the future of business documents.

SUMMARY

- Dialogue Genie generates personalized, professional, dynamic and accurate business documents
- Is as robust and dependable as other market leaders, yet faster, intuitive, more flexible and much more efficient
- Can be installed into any ecosystem, platform and can deliver any document type through any delivery channel.
- Builds a perfect solution for small to large organizations using legacy systems, such as Jetform, Adobe Central Pro, Create!Form, DocPath, StreamServe, Smartcom, ISIS Papyrus, Assentis or similar

If your organization is using a legacy document generation solution, but it holds you back from keeping up with your competitors in customer engagement, it is time to consider your options. From continuous technical support to reduced document production times and lower costs, a switch to Dialogue Genie offers all you would expect and more.

Dialogue Genie runs on DocOrigin document generation engine. It has been developed by the core team that was instrumental of the Adobe/JetForm Central products. Therefore, Dialogue Genie benefits from a significant maturity built on future-proof technology. Our experience and expertise has resulted in being in a position to offer a comprehensive set of migration tools and strategies aimed at providing out of the box replacements existing legacy solutions in this space.

SOLUTION DESCRIPTION

Dialogue Genie is an innovative and reliable solution for creating, managing, editing and delivering professional business communication in any format across multiple communication channels. With thousands installations worldwide, Dialogue Genie's document generation engine proves its reliability, flexibility, security and speed, delivering communication and documents to its audiences faster than its peers with no outage at any customer.

ONE FORM AT A TIME

One of the greatest challenges for many customers is the process of migrating from “old” to “new”. We can help you with this changeover. Our representatives can show you how to migrate to Dialogue Genie on a template-by-template basis. You can have your current system and Dialogue Genie both running productively, and once all your templates are migrated, you can “pull the plug” on the old system. You can expect a smooth transition, with little or no disruption to your critical document generation processes.

CONVERT FORMS IN SECONDS

Dialogue Genie can open legacy document templates, such as Jetform, Adobe Central Pro, StreamServe (PageOut) or similar directly and save them as Dialogue Genie document template files. Single-page and multi-page static forms migrate easily and accurately. The template conversion takes just seconds. The migration and conversion tools provided for templates and data helped existing customers to reduce their design and quality assurance time by about 70%. Manual adjustment of the automated conversion results may be required and will vary based on the complexity of the original form.

CONVERSION DUE DILIGENCE

It is typical to undertake a due diligence process when contemplating migration from one product to another, especially when proprietary assets are involved, as they are with many legacy products. The due diligence process ensures that both the customer and the new vendor are cognizant of the restrictions and risks in the use or handling of proprietary assets. Our team of experts can assist you in navigating through the due diligence process, and in organizing, managing and conducting your migration effort.

IMPROVE BUSINESS EFFICIENCY

But it's not only business user and service subscribers who benefit from the transition to multichannel platforms. Dialogue Genie helps companies to streamline business processes, while saving time and money:

- Reduced document development and processing time by over 75%
- Reduced document maintenance costs by over 70% a year
- Reduced migration risk by profiting from industry-recognized and proven technologies.

BUSINESS BENEFITS

- **Automated Migration:** open Jeffform/Accelio/Adobe Central templates and others directly in Dialogue Genie and save them as modern document template files.
- **Cost Reduction:** cut cost of existing solution without any hidden charges
- **Convenience:** one designer for all document, form and label templates
- **Speed:** fast document generation in batch-mode (30,000 pages per minute) and manual mode (less than 1 minute), without slowing down any other systems
- **Knowledge Transfer:** fast training of new staff due to user-friendly interfaces and detailed documentation, e.g. user manuals, online help, technical papers/guides
- **Adaptability:** fits business requirements – high or low volume
- **Reliability:** no production outages with any client in the last 6 years
- **Flexibility:** easily create any template with convenient preview. Enhance your layout easily with dynamic messages, page overlay, lines, boxes, fields, and checkboxes, barcodes, complex tables, charts and images
- **Integration:** tight integrations with leading business systems
- **Efficiency:** maximal use of resources, e.g. human and equipment
- **Compliance:** ability to: approve document templates, lock down regulatory language within document templates and meet regulatory requirements
- **ROI:** achieved in less than 1 year.
- **Industry Recognition:** Fortune 200 companies trust this CCM solution.
- **Omnichannel Distribution:** print, fax, email, SMS, portal and more
- **Process Automation:** automated sorting and bundling of generated but not yet delivered documents
- **Personalization:** possibility to add targeted messages automatically
- **Support:** 24/7 assistance from product expert teams around the globe.
